

CASE STUDY - ENGINEERING

Industrial equipment transport to the Netherlands

Heavy palletised engineering equipment moved from Greater Manchester to a commercial facility in Rotterdam as a coordinated UK-to-Europe plan.

AT A GLANCE

Sector

Engineering

Service

European road freight

Route

Manchester -> Rotterdam

Load type

Palletised industrial equipment

Requirement

International road freight movement

Planned from

Stockport, Greater Manchester

THE REQUIREMENT

An engineering business needed palletised industrial equipment transported from Greater Manchester to a commercial facility in Rotterdam.

Weight and dimensions had to be reviewed before capacity could be committed, since not every trailer type suited the load.

THE CHALLENGE

Heavy commercial freight crossing to Europe combines vehicle suitability, international transit planning and delivery coordination at the receiving site.

HOW WE MANAGED IT

Johnson's Haulage planned the movement and sourced appropriate road freight capacity through its approved European carrier network.

Loading and securing requirements were agreed in advance with both the collection point and the carrier.

THE OUTCOME

The equipment was managed through a coordinated UK-to-Europe transport plan with one operational point of contact.

FREQUENTLY ASKED QUESTIONS

Is customs clearance included in your European transport rates?

Yes - standard export and import declarations are included on most lanes, so you get a single all-in price for door-to-door transport and paperwork.

How long does UK to Germany transport take?

Groupage typically runs on a 3-5 working-day transit; dedicated full loads can deliver next-day or 48-hour depending on the region and driver hours.

Do you offer same-day haulage across the UK?

Yes. Our dedicated same-day service typically arranges collection within 60 minutes of booking anywhere in mainland UK, with a straight run to the delivery point and progress updates along the way.

Can you move oversized or out-of-gauge items?

Project and abnormal loads are arranged through specialist partners, including route surveys and any notifications required before the movement.

ABOUT THIS CASE STUDY

Representative scenario based on the types of transport requirements managed by Johnson's Haulage. Customer details and scenarios are anonymised.

Johnson's Haulage is a transport and logistics management company. Every movement is planned in-house and delivered by a vetted carrier from our approved network.
