

CASE STUDY - PRECISION MANUFACTURING

Dedicated UK to Germany delivery for a precision manufacturer

A UK manufacturer needed production components moved directly to a European facility, with documentation and delivery timing coordinated as one movement.

AT A GLANCE

Sector

Precision manufacturing

Service

European dedicated transport

Route

Sheffield -> Stuttgart

Load type

Production components

Requirement

Time-critical cross-border delivery

Planned from

Stockport, Greater Manchester

THE REQUIREMENT

A UK manufacturer required production components transported directly to a European facility.

The receiving plant needed certainty on the delivery plan, so the movement had to be handled as a single door-to-door arrangement rather than a series of separate bookings.

THE CHALLENGE

Production-critical goods leave little tolerance for consolidation delays, and cross-border movements add documentation coordination on top of the transit itself.

HOW WE MANAGED IT

Johnson's Haulage arranged dedicated European vehicle capacity and coordinated the movement from UK collection through to delivery in Germany.

Paperwork requirements were confirmed with the customer before collection so the vehicle was not held at any point in the journey for missing documentation.

THE OUTCOME

The manufacturer had a single operational contact throughout the movement and clear visibility of the delivery plan.

FREQUENTLY ASKED QUESTIONS

Is customs clearance included in your European transport rates?

Yes - standard export and import declarations are included on most lanes, so you get a single all-in price for door-to-door transport and paperwork.

How long does UK to Germany transport take?

Groupage typically runs on a 3-5 working-day transit; dedicated full loads can deliver next-day or 48-hour depending on the region and driver hours.

What is dedicated transport?

Dedicated transport is a vehicle sourced through our carrier network and committed exclusively to your freight for the duration of the job - it does not carry other customers' loads or make unrelated stops.

Can you support line-side and inbound delivery schedules?

Yes. Inbound movements are planned backwards from your line requirement, with collection booked at the supplier and arrival confirmed against your goods-in window.

ABOUT THIS CASE STUDY

Representative scenario based on the types of transport requirements managed by Johnson's Haulage. Customer details and scenarios are anonymised.

Johnson's Haulage is a transport and logistics management company. Every movement is planned in-house and delivered by a vetted carrier from our approved network.
